

## Process for Expiring/ Expired Juice

Each Store will keep track of their expiring juice in the shared excel form in their gmail

Items that are expiring in the current month pull those and take them out of inventory with an inventory count

Items that are expiring the NEXT month, move to a discount area for 20%off

This will be for a juice we still carry

This would also be for certain flavors of a juice line, but not the entire juice line

If it is a whole juice line It will most likely be just a price reduction

Once the next month becomes the current month then take out those remaining juices with an inventory count
